

Sources of Blame Attribution: Citizen Attitudes towards Public Officials after 9/11

Variables & Inclusion Criteria

Version 1

June, 2011

METHODOLOGY

The study used a short Internet-based survey experiment to test whether party cues affect people's attitudes about the responsibility of three government officials in making America vulnerable to the 9/11 attacks: CIA Director George Tenet, FBI Director Louis Freeh, and Federal Reserve Chairman Alan Greenspan. The survey was conducted by Knowledge Networks (KN) over the Internet in February 2007, using a nationally representative sample of 1015 American adults. KN recruits panel members over the telephone via random digit dialing (RDD) and provides them with WebTV equipment in exchange for their participation in weekly surveys, which they complete online. All Americans were sampled from the KN panel.
